We create an assortment of custom signage for your interior spaces. Explore the different types below.

DIRECTIONAL

Directional signage provides accurate and easy to understand directions to guide people to their destination as simply as possible.

Using directional signs help make your building easy to navigate with simple to read signage that inform, reinforce your brand, and help improve traffic flow.

IDENTIFICATION

Identification signage is a style of signage that clearly marks a particular area and indicates that you have arrived at a location.

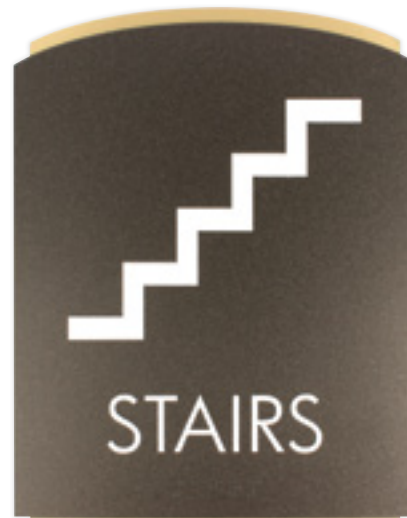

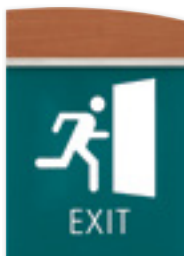

Typically these signs specify the name or number of a room or the entrance to a department or office. They are generally placed adjacent to doorway entrances and most often ADA compliant.

REGULATORY

Regulatory signage is the foundation for creating a safe environment.

Primarily ADA compliant, regulatory signage is focused on safety and liability concerns. They display a clear, concise, and prominent message and are used to establish and reinforce rules, safety standards, and privacy expectations.

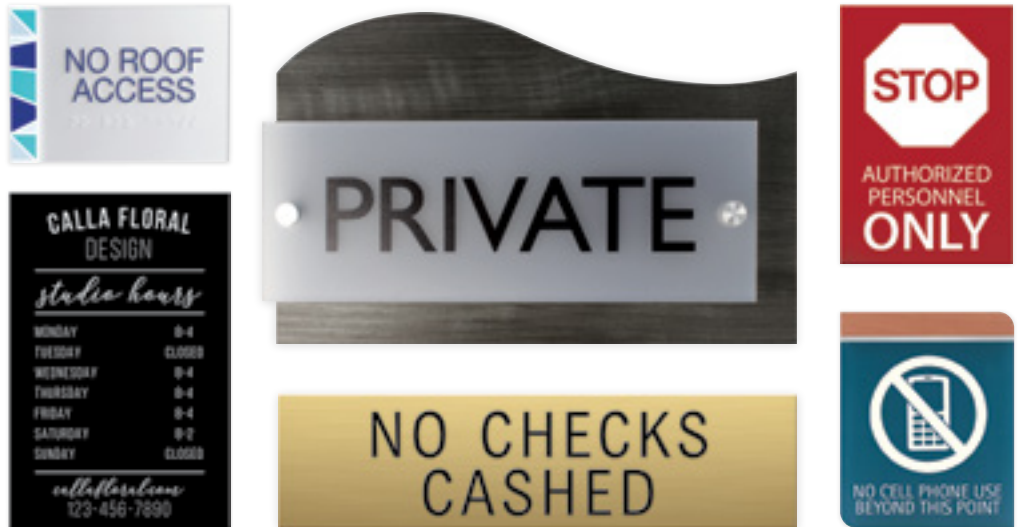

FROM WAYFINDING TO ROOM IDENTIFICATION, INTERIOR SIGNAGE IS KEY TO DELIVERING ESSENTIAL INFORMATION TO YOUR VISITORS. WE CAN HELP YOU WITH CREATING A SINGLE PIECE TO AN ENTIRE SIGNAGE ROLLOUT.

INFORMATIONAL

Informational signage pertains to the overall facilities and provide visitors with broad information such as hours of operation, amenities, and business policies that they need while navigating.

The use of informational signage should answer questions before they're asked and be universally understandable at a glance.

DIRECTORY

Directory signage is absolutely essential for every kind of building and enables your visitors to easily locate and navigate to the correct location within your facility.

Do you need to make changes frequently to your directory signs? We offer directory styles that can quickly be switched out as needed.

WINDOW & INSERT

Window and Insert signage is a highly versatile signage option for practically any facility.

These signs are ideal for displaying both permanent information (room numbers or room names) and adjustable information that may need to be updated occasionally (staff names, schedules, or other items).

Explore Schwaab's Signage Collection!

Designed to take the hassle out of creating a sign, our signage collection makes it very easy to create a cohesive and distinctive signage system that enhances any décor and suits any budget.

ARTWORK GUIDELINES

To achieve the best quality for your custom products, please follow these artwork guidelines when preparing and submitting your design files

General Requirements

- **Vector artwork** (AI, EPS, PDF with retained vectors) is required for most products due to its scalability without loss of quality.
- For **rubber stamps**, raster images (JPG, PNG) may be accepted if the file resolution is at least 300 DPI to avoid pixelation.
- **Website graphics** are low resolution and unsuitable for reproduction.

VECTOR ARTWORK

Vector artwork consists of paths which can be scaled to any size without losing its detail and clarity.

RASTER ARTWORK

Raster artwork is compiled using pixels and can appear jagged and lose detail if scaled or printed at a resolution higher than its original settings.

All Products

- Submit artwork at full scale.
- Convert all text to outlines to avoid font compatibility issues.
- Embed any linked images to prevent missing elements.
- Remove unnecessary strokes, measurements, or layout lines.
- Photographic files for digital printing must be at least 300 DPI and a minimum of 25% of the desired final print size to ensure clarity.

Rubber Stamps

- Submit logos in solid black with no color gradients or designs that may not translate well to one ink color.
- Avoid fine lines or intricate details, as they may not reproduce clearly.
- Ensure text is large enough to remain legible when stamped, as small text may not render effectively.

Engraved Products

- Artwork should be in black and white, with black representing engraved areas and white representing unengraved areas.
- Logos with multiple colors or gradients will not translate effectively into a single solid color image.

ACCEPTABLE HIGH RESOLUTION

This image is 300 dpi and would print clearly

INADEQUATE LOW RESOLUTION

This image is 72 dpi and would print pixelated.

ACCEPTABLE STAMP LOGO

INADEQUATE STAMP LOGO

ACCEPTABLE ENGRAVING LOGO
