REGULATORY
Signage

Regulatory signage is the foundation for creating a safe environment.

Primarily ADA compliant, regulatory signage is focused on safety and liability concerns.

They display a clear, concise and prominent message and is used to help establish and reinforce rules, safety standards and privacy expectations.

DIRECTORY
Signage

Directory signage is the absolutely essential for every building and enables your visitors to easily locate and navigate to the correct location within your facility.

Do you need to make changes frequently to your directory signs?

We offer a wide variety of directory styles that can be quickly switched out as needed.

We can also customize to any shape and size you require.
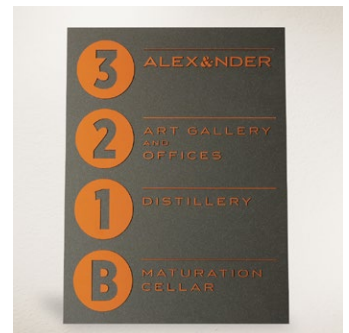

INFORMATIONAL
signage

The use of informational signage should help answer questions before they're asked and be universally understandable at a glance.
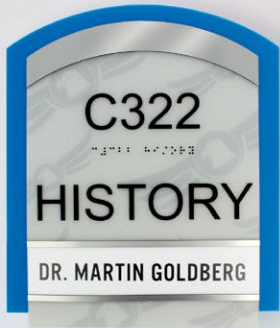

Informational signage pertains to the overall facilities and provide visitors with broad information such as maps, hours of operation, amenities, menus, and business policies that they need while navigating.

They are placed in areas with greater exposure such as lobbys and entrances.
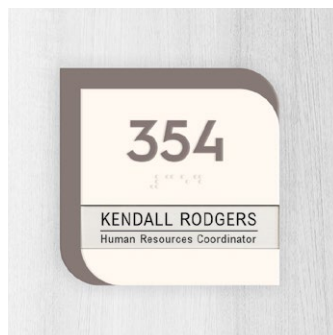

WINDOW + INSERT *Signage*

Window and insert signage is a highly versatile signage option for practically any facility.

These signs are ideal for displaying both permanent information (room numbers or room names) and also adjustable information that may need to be updated occasionally (staff names, schedules, or other items).
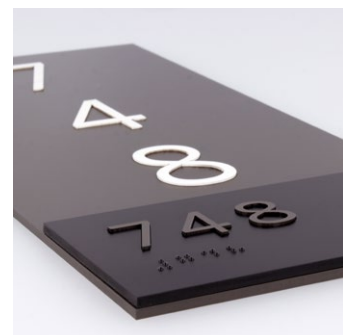

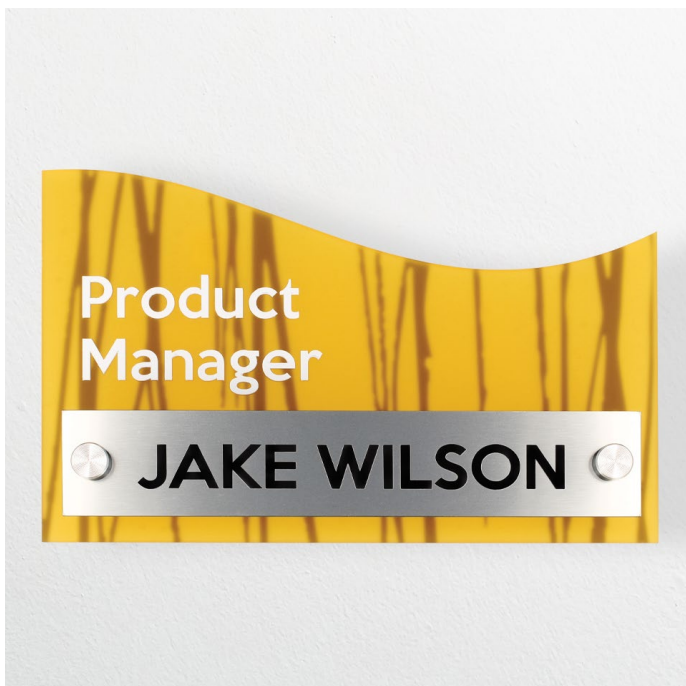

IDENTIFICATION
signage

Identification signage is a style of signage that clearly marks a particular area and indicates that you have arrived at a location.

Typically these signs specify the name or number of a room or the entrance to a department or office.

They are generally placed adjacent to doorway entrances and most often ADA compliant.
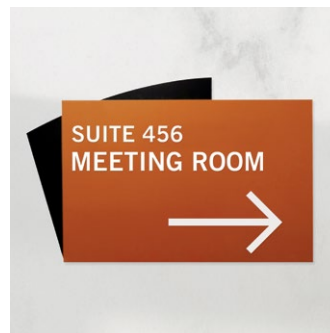

DIRECTIONAL *signage*

Directional signage provides accurate and easy to understand directions to guide people to their destination as simply as possible.

APPLIQUÉ SIGNS

In this process, laser-cut tactile letters or pictogram elements, also known as "appliqué" are applied to the sign substrate with the corresponding insert braille beads.

FEATURES

- Traditional ADA Sign Solution.
- The versatility and flexibility in approved material choices make this method a popular choice.
- Great for office buildings and businesses.

SEE THE *benefits* OF

ADA signage allows you to adhere to the Americans with Disabilities Act. ADA signs include letters and braille that are prominently raised from the signs surface.

3D PRINTED SIGNS

In this process, signs are produced by digitally printing multiple layers of ink to produce raised-texture letters and braille that are ADA compliant. Allows for intricate and unique designs that are fully customized!

FEATURES

- Economic alternative to photopolymer ADA signage fabrication.
- UV Ink resistant to scratches & fading.
- Tamper resistant.
- PMS color matching available.

OUR ADA PROCESSES.
